DESCRIPTORS Crime; Criminology; Indexing; *Information Retrieval; Information Systems; *Justice; *Law Enforcement; *Subject Index Terms; *Thesauri; Word Frequency

ABSTRACT

Contained are listings of descriptors used to index the literature in the National Criminal Justice Reference Service (NCJRS) documentation data base, and to store and retrieve information about the literature for users of the service. Term selection is determined by the vocabulary used in the documents input into the system, the frequency of term usage in the literature, and the language of the community. Two types of terms are listed: descriptors and synonyms or near synonyms. Descriptors are listed in alphabetical order with related terms (RT), broader terms (BT), and narrower terms (NT) listed under the appropriate descriptor. Scope notes (SN) and used for (UF) terms may also be utilized to provide definitions, and to place positive or negative limitations on usage. The thesaurus is divided into three main sections: substantive, organizational, and geographic descriptors. (Author/MBR)

Introduction	
Section I	Substantive Descriptors
Section II	Organizational Descriptors
Section III	Geographic Descriptors

Introduction

The NATIONAL CRIMINAL JUSTICE THESAURUS contains listings of descriptors or terms used to index the literature in the National Criminal Justice Reference Service (NCJRS) documentation data base and to store and retrieve information about the literature for users of the service. Term selection is based, largely, on the vocabulary of the authors of the documents entering the NCJRS system, on the frequency of term usage in the literature, and the language of the user community. The five digit code assigned to each term is for NCJRS internal use.

SUBSTANTIVE DESCRIPTORS AND RELATED ENTRIES

Two types of terms are listed: descriptors and synonyms or near synonyms. Descriptors are authoritative terms that are acceptable for indexing and searching. A USE entry follows synonyms or near synonyms of descriptors. This entry directs the user to the preferred valid descriptor for communicating with the system. Synonym entries appear solely to provide as many points of entry to the Thesaurus as possible. The importance of the USE entry extends beyond synonymy. The entry can represent the relationship to a descriptor of a near synonym with general conceptual similarity. The system is entered using the valid descriptor denoted under such an entry. For example:

	REMOTE TERMINALS
01027	USE TERMINALS

The USED FOR (UF) entry is the reverse of the USE entry. The entry shows the user that the descriptor includes the concept represented by the UF entry. For example:

01027	TERMINALS
	UF REMOTE TERMINALS

A NARROWER TERM (NT) entry denotes a hierarchical relationship between the main descriptor and a descriptor that belongs in the same class but is on a lower level, that is, the narrower term is more specific. For example:

04505	SECURITY
03871	NT AIRCRAFT SECURITY
04504	NT BUSINESS SECURITY
02205	NT CAMPUS SECURITY
04228	NT CARGO SECURITY
04297	NT COMPUTER SECURITY

A BROADER TERM (BT) entry is also a hierarchical notation and is the reciprocal of the NT notations. A BT entry indicates that the descriptor is in the same class but that it is on a higher level in the hierarchy. For example:

04228	CARGO SECURITY	
04505	BT	SECURITY

The RELATED TERM (RT) entries perform two functions, only one of which is concerned with the scope of the main entry. A term listed as RT may clarify scope, that is, provide further definition of the main descriptor entry. The alternate function is to alert the user to terms other than the main descriptor entry and thus provide collateral word relationships. For example, to illustrate the two-sided RT relationship:

02090	POLICE WEAPONS	
04323	BT	POLICE EQUIPMENT
04654	RT	FIREARMS
04869	RT	HANDGUNS
04869	HANDGUNS	
04654	BT	FIREARMS
03879	RT	ILLICIT FIREARMS
02090	RT	POLICE WEAPONS

Every hierarchical and collateral entry has a complementary entry elsewhere in the Thesaurus.

A SCOPE NOTE (SN) explains the specific use of a term in the NCJRS system. It may be a true definition, may place a positive or negative limitation on usage, or may combine definition and positive limitation. A very broad term may have an instruction 'USE MORE SPECIFIC TERM IF POSSIBLE.'

The order in which notations appear under a descriptor, when appropriate, follows:

SN	SCOPE NOTE
UF	USED FOR
NT	NARROWER TERM
BT	BROADER TERM
RT	RELATED TERM

ORGANIZATIONAL AND GEOGRAPHIC DESCRIPTORS

These descriptors, in their respective sections, are treated in the same manner as the substantive terms, that is, structured using the UF, NT, BT, and RT notations as required. A relatively obscure organization - International, American, or newly organized - is scoped. For organizational terms, acronyms and mnemonics are UF entries, and broader and narrower terms are indicated as necessary.

There is a limitation of 42 characters for each entry; therefore, there are abbreviations used in these descriptors. Geographic terms use the NT-BT notations for countries and continents or similar geographic areas (e.g. Far East), and NT-BT notations for states and regions. For example:

90040	MIDDLE ATLANTIC STATES	
34000	NT	NEW JERSEY
36000	NT	NEW YORK
42000	NT	PENNSYLVANIA
90990	BT	UNITED STATES OF AMERICA

There are scope notes and USED FOR entries to simplify usage for overlapping jurisdictions. In gerneral, the names of countries other than the the United States are used rather than cities or other geopolitical configurations in those countries.
